The following words appear in the reading selection. They all have something in common—double consonants.

beginning
classical

glasses
million

Remember: consonants are all the letters of the alphabet except **a, e, i, o, u,** and sometimes **y.**

Very often we don't hear all the sounds in words. Sometimes two letters join together to make one sound. In the above words, there is only one sound where there are two of the same consonants together.

On your left is a Study List of words with double consonants. Try to remember that even though there may be only one sound, there are two consonants.
